

# **FabShops: Intro to 3D Printing**

SketchUp Make Tutorial

By Adrian Yao

## Part Tutoriala

3. Cut the circles out of the block by

6. Once you have the two countersunk cones created, you can then extrude the rest of the circle

## Filleting and Rounding Corners

1. First off we will round the corners of the base block. To do that, we will use the arc tool. Draw

6.

4.

3.

## Creating 3D Text

3.
